CORE-MARK HOLDING COMPANY, INC. AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

1. Summary of Company Information and Basis of Presentation

Business

Core-Mark Holding Company, Inc., and its subsidiaries (collectively referred to herein as “the Company” or “Core-Mark”), is one of the largest marketers of fresh and broad-line supply solutions to the convenience retail industry in North America. The Company offers a full range of products, marketing programs and technology solutions to approximately 43,000 customer locations in the United States (“U.S.”) and Canada. The Company’s customers include traditional convenience stores, drug stores, big box or supercenter stores, grocery stores, liquor stores and other specialty and small format stores that carry convenience products. The Company’s product offering includes cigarettes, other tobacco products, alternative nicotine products, candy, snacks, fast food, groceries, fresh products, dairy, bread, beverages, general merchandise and health and beauty care products. The Company operates a network of thirty-two distribution centers in the U.S. and Canada (excluding two distribution facilities it operates as a third-party logistics provider). Twenty-seven distribution centers are located in the U.S. and five are located in Canada.

Basis of Presentation and Principles of Consolidation

The accompanying unaudited condensed consolidated balance sheets as of June 30, 2019, the unaudited condensed consolidated statements of operations and comprehensive income, the unaudited condensed consolidated statements of stockholders’ equity for the three and six months ended June 30, 2019 and 2018, and the unaudited condensed consolidated statements of cash flows for the six months ended June 30, 2019 and 2018, have been prepared in accordance with the requirements of the U.S. Securities and Exchange Commission (“SEC”) for interim reporting. Accordingly, certain footnotes and other financial information that are normally required by generally accepted accounting principles in the U.S. (“GAAP”) have been condensed or omitted. The condensed consolidated balance sheet as of December 31, 2018 has been derived from the Company’s audited financial statements, which are included in its 2018 Annual Report on Form 10-K, filed with the SEC on March 1, 2019.

The consolidated financial statements include Core-Mark and its wholly-owned subsidiaries. All intercompany balances and transactions have been eliminated in the consolidated financial statements.

The unaudited condensed consolidated interim financial statements should be read in conjunction with the Company’s audited consolidated financial statements in its Annual Report on Form 10-K, for the year ended December 31, 2018.

The unaudited condensed consolidated interim financial statements include all adjustments necessary for the fair presentation of the Company’s consolidated results of operations, financial position, comprehensive income, changes in stockholders’ equity and cash flows. Results for the interim periods are not necessarily indicative of results to be expected for the full year or any other future periods.

Subsequent to the issuance of the Company’s interim condensed consolidated financial statements as of and for the three and six months ended June 30, 2018, management determined that the amount of foreign currency translation loss disclosed for the six months ended June 30, 2018 was overstated by \$0.9 million in the condensed consolidated statement of comprehensive income, which also impacted retained earnings and accumulated other comprehensive loss by the same amount as of June 30, 2018, as currently presented in the condensed consolidated statement of stockholders’ equity. The impacted financial statement line items have been adjusted in the prior periods presented to correct for this overstatement.

2. Summary of Significant Accounting Policies

Adoption of Other Accounting Pronouncements

On February 25, 2016, the FASB issued ASU No. 2016-02, *Leases (Topic 842)* (“ASU 2016-02”), which supersedes the lease accounting requirements in ASC 840. The most significant among the changes in ASU 2016-02 is the recognition of right-of-use (“ROU”) assets and corresponding lease liabilities for leases classified as operating leases. The accounting for finance leases, which were classified as capital leases under historical GAAP, remains substantially unchanged. The lease liabilities are equal to the present value of the remaining lease payments while the ROU asset is determined based on the amount of the lease liability, plus initial direct costs incurred less lease incentives. The Company elected the optional transition method to apply ASU 2016-02 prospectively at adoption effective January 1, 2019, which resulted in recognition of additional lease assets of approximately \$232.1 million, lease liabilities of \$244.9 million, and a decrease of deferred rent recorded under ASC 840 of \$12.8 million. Comparative periods presented in the Consolidated Financial Statements prior to January 1, 2019 continue to be presented

[Table of Contents](#)

under ASC 840. The Company has implemented internal controls and new lease software to assist with future reporting. ASU 2016-02 does not have an impact on the Company's debt-covenant compliance under its current revolving credit facility.

In accordance with an accounting policy election under ASU 2016-02, the Company does not recognize assets or liabilities for leases with an initial term of twelve months or less; these short-term lease payments are recognized in the consolidated statements of operations on a straight-line basis over the lease term. The Company elected the package of practical expedients within ASU 2016-02 that allows an entity to not reassess, prior to the effective date, (i) whether any expired or existing contracts are or contain leases, (ii) the lease classification for any expired or existing leases, or (iii) initial direct costs for any existing leases. The Company also elected the practical expedient to combine lease and non-lease components for all asset classes.

Recent Accounting Standards or Updates Not Yet Effective

On January 26, 2017, the FASB issued ASU No. 2017-04, *Intangibles - Goodwill and Other (Topic 350): Simplifying the Test for Goodwill Impairment* ("ASU 2017-04"). The new guidance simplifies the subsequent measurement of goodwill by eliminating Step 2 from the goodwill impairment test. ASU 2017-04 requires goodwill impairment to be measured as the amount by which a reporting unit's carrying amount exceeds its fair value, not to exceed the carrying amount of its goodwill. ASU 2017-04 requires prospective application and is effective for annual periods beginning after December 15, 2019. ASU 2017-04 will require the Company to amend its methodology for determining any goodwill impairment calculations beginning in 2020.

Concentration of Credit Risks

Financial instruments, which potentially subject the Company to concentrations of credit risk, consist principally of cash investments, accounts receivable and other receivables. The Company places its cash and cash equivalents in short-term instruments with high-quality financial institutions and limits the amount of credit exposure in any one financial instrument.

A credit review is completed for new customers and ongoing credit evaluations of each customer's financial condition are performed periodically, with reserves maintained for potential credit losses. Credit limits given to customers are based on a risk assessment of their ability to pay and other factors. Accounts receivable are typically not collateralized, but the Company may require prepayments or other guarantees whenever deemed necessary.

Murphy U.S.A., the Company's largest customer, accounted for approximately 13% of the Company's net sales for the three and six months ended June 30, 2019 and approximately 12% of the Company's net sales for the three and six months ended June 30, 2018. No other customers individually accounted for more than 10% of sales for these periods. No single customer accounted for 10% or more of the Company's accounts receivables as of June 30, 2019 or December 31, 2018.

3. Inventories, net

Inventories consist of the following (in millions):

	June 30, 2019	December 31, 2018
Inventories at FIFO, net of reserves	\$ 779.9	\$ 866.1
Less: LIFO reserve	(191.5)	(177.1)
Total inventories, net of reserves	<u>\$ 588.4</u>	<u>\$ 689.0</u>

Cost of goods sold reflects the application of the last-in, first-out ("LIFO") method of valuing inventories in the U.S. based upon estimated annual producer price indexes. Inventories in Canada are valued on a first-in, first-out ("FIFO") basis, as LIFO is not a permitted inventory valuation method in Canada. During periods of rising prices, the LIFO method of costing inventories generally results in higher current costs being charged against income while lower costs are retained in inventories. Conversely, during periods of decreasing prices, the LIFO method of costing inventories generally results in lower current costs being charged against income and higher stated inventories. If the FIFO method had been used for valuing inventories in the U.S., inventories would have been approximately \$191.5 million and \$177.1 million higher as of June 30, 2019 and December 31, 2018, respectively. The Company recorded LIFO expense of \$7.4 million and \$6.9 million for the three months ended June 30, 2019 and 2018, respectively, and \$14.4 million and \$12.8 million for the six months ended June 30, 2019 and 2018, respectively.

4. Leases

The Company leases warehouse facilities, trucks, office equipment and certain sales offices. Certain of the Company's real estate leases include one or more options to renew the applicable lease agreement, with the exercise of renewal options at the Company's sole discretion; the Company generally includes only one real estate lease extension option in the recognition of ROU assets and lease liabilities. Certain of the Company's vehicle leases have residual value guarantees.

[Table of Contents](#)

Leases with an initial term of twelve months or less are not recorded on the balance sheet; the Company recognizes lease expenses for such leases on a straight-line basis over the lease term. The majority of the Company's lease payments are fixed and are incorporated into the ROU lease assets and liabilities. However, certain vehicle leases have variable payments, such as per-mile charges, which are expensed as incurred. The Company combines lease components and non-lease components for all asset classes for purposes of recognizing lease assets and liabilities.

Leases consist of the following (in millions):

Assets	Classification	June 30, 2019
Operating	Operating lease ROU assets	\$ 221.1
Finance	Property and equipment, net	35.0
Total leases		\$ 256.1

Amounts borrowed (Credit Facility)	\$ 310.7	\$ 320.0
Obligations under finance leases	35.7	26.2
Total long-term debt	\$ 346.4	\$ 346.2

The Company has a revolving credit facility (the “Credit Facility”) with a capacity of \$750.0 million as of June 30, 2019, limited by a borrowing base consisting of eligible accounts receivable and inventories. The Credit Facility expires in March 2022 and has an expansion feature which permits an increase of \$200.0 million, subject to borrowing base requirements. All obligations under the Credit Facility are secured by first-priority liens on substantially all of the Company’s present and future assets. The terms of the Credit Facility permit prepayment without penalty at any time (subject to customary breakage costs with respect to London Interbank Offered Rate (“LIBOR”) or Canadian Dollar Offered Rate (“CDOR”) based loans prepaid prior to the end of an interest period).

Amounts related to the Credit Facility are as follows (in millions, except interest rate data):

6. Contingencies

Litigation

The Company is subject to certain legal proceedings, claims, investigations and administrative proceedings in the ordinary course of its business. The Company records a provision for a liability when it is probable that the liability has been incurred and the amount of the liability can be reasonably estimated. These provisions, if any, are reviewed at least quarterly and adjusted to reflect the impacts of negotiations, settlements, rulings, advice of legal counsel and other information and events pertaining to a particular case. In the opinion of management, the outcome of pending litigation is not expected to have a material effect on the Company's results of operations, financial condition or liquidity.

7. Earnings Per Share

The following table sets forth the computation of basic and diluted net earnings per share (dollars and shares in millions, except per share amounts):

	Three Months Ended June 30,		Six Months Ended June 30,

Diluted ⁽¹⁾	\$ 0.38	\$ 0.24	\$ 0.41	\$ 0.21

(1) Basic and diluted earnings per share are calculated based on unrounded actual amounts.

The number of common shares that were not included in the computation of diluted earnings per share because the effect would have been anti-dilutive were 7,927 and 12,138, for the three and six months ended June 30, 2019, respectively, and 424,354 and 486,269, for the same periods in 2018, respectively.

8. Stock-based Compensation Plans

2019 Long-Term Incentive Plan

On May 21, 2019, the Company's stockholders approved the 2019 Long-Term Incentive Plan ("2019 LTIP") which, among other things, replaces the Company's 2010 Long-Term Incentive Plan (as amended, the "2010 LTIP") and reserves for awards an aggregate of up to 4,236,959 shares, consisting of 3,523,862 shares of the Company's common stock currently available for future issuance under the 2019 LTIP, and 713,097 shares that may become available for future issuance under the 2019 LTIP in the event of forfeiture of currently outstanding awards. The 2019 LTIP allows the Company to grant, among other things, time-vesting and performance-vesting restricted stock unit awards. Awards may be made under the 2019 LTIP through May 21, 2029.

Grant Activities

During the six months ended June 30, 2019 and 2018, the Company granted 223,308 and 317,420, respectively, time-vesting restricted stock units to certain of its employees and non-employee directors under the 2010 LTIP at a weighted-average grant date fair value of \$29.38 and \$23.77, respectively.

Under the 2019 LTIP, the Company granted 6,927 time-vesting restricted stock units to certain of its employees at a weighted-average grant date fair value of \$38.98 for the six months ended June 30, 2019.

For the six months ended June 30, 2019, the Company granted 154,511 performance-based restricted stock units to certain of its employees at a weighted-average grant date fair value of \$29.90. The 154,511 performance shares represent the maximum number that can be earned. The number of performance shares that employees ultimately earn will be based on the Company's achievement of certain specified performance targets for the full year of 2019. For the six months ended June 30, 2018, the Company granted 175,581 performance-based shares to certain of its employees at a weighted-average grant date fair value of \$23.78, of which 141,406 were ultimately earned, based upon 2018 performance criteria achieved.

Stock-based Compensation Cost

Total stock-based compensation cost included in selling, general and administrative expenses was \$2.2 million and \$2.5 million for the three months ended June 30, 2019 and 2018, respectively. During the six months ended June 30, 2019 and 2018, the Company recognized stock-based compensation cost of \$4.1 million and \$4.4 million, respectively. Total unrecognized stock-based compensation cost related to unvested share-based compensation arrangements was \$16.0 million at June 30, 2019, which is expected to be recognized over a weighted-average period of 1.9 years. Total unrecognized stock-based compensation cost may be adjusted for any unearned performance shares or forfeited shares.

9. Stockholders' Equity

Dividends

The Board of Directors approved the following cash dividends in 2019 (in millions, except per share data):

Declaration Date	Dividends Per Share	Record Date	Cash Payment Amount	Payment Date
February 28, 2019	\$0.11	March 12, 2019	\$5.1	March 22, 2019
May 7, 2019	\$0.11	May 23, 2019	\$5.1	June 14, 2019
August 6, 2019	\$0.11	August 22, 2019	N/A ⁽¹⁾	September 13, 2019

(1) Amount will be determined based on common stock outstanding as of the record date.

Repurchase of Common Stock

On August 28, 2017, the Company's Board of Directors authorized a \$40.0 million stock repurchase program (the "Program"), replacing the Company's prior stock repurchase program. The timing, price and volume of purchases under the Program are based on market conditions, cash and liquidity requirements, relevant securities laws and other factors. The Program may be discontinued or amended at any time. The Program has no stated expiration date and terminates when the amount authorized has been expended or the Board of Directors withdraws its authorization.

During the three and six months ended June 30, 2019, no shares of common stock were repurchased under the Program. During the three months ended June 30, 2018, the Company spent \$4.7 million to repurchase 232,817 shares of common stock under the Program. During the six months ended June 30, 2018, the Company spent \$7.5 million to repurchase 356,108 shares

[Table of Contents](#)

of common stock under the Program. As of June 30, 2019, there was \$22.4 million available for future share repurchases under the Program.

10. Segment and Geographic Information

The Company identifies its operating segments based primarily on the way the Chief Operating Decision Maker (“CODM”) evaluates performance and makes decisions. The Chief Executive Officer of the Company has been identified as the CODM. From the perspective of the CODM, the Company is engaged primarily in the business of distributing packaged consumer products to convenience retail stores in the U.S. and Canada (collectively “North America”), each of which consists of customers that have similar characteristics. Therefore, the Company has determined that it has two operating segments, U.S. and Canada, which aggregate to one reportable segment. Additionally, the Company presents its segment reporting information based on business operations for each of the two geographic areas in which it operates and also by major product category.

Information about the Company’s business operations based on geographic areas is as follows (in millions):

ITEM 2. MANAGEMENT’S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion and analysis should be read together with the unaudited condensed consolidated interim financial statements, including the related notes, and the other financial information appearing elsewhere in this Quarterly Report on Form 10-Q.

FORWARD-LOOKING STATEMENTS

Statements in this Quarterly Report on Form 10-Q that are not statements of historical fact are forward-looking statements made pursuant to the safe-harbor provisions of the Securities Exchange Act of 1934 and the Securities Act of 1933.

Forward-looking statements in some cases can be identified by the use of words such as “may,” “will,” “should,” “potential,” “intend,” “expect,” “seek,” “anticipate,” “estimate,” “believe,” “could,” “would,” “project,” “predict,” “continue,” “plan,” “propose” or other similar words or expressions. Forward-looking statements are made only as of the date of this Form 10-Q and are based on our current intent, beliefs, plans and expectations. They involve risks and uncertainties that could cause actual future results, performance or developments to differ materially from historical results or those described in or implied by such forward-looking statements.

Factors that might cause or contribute to such differences include, but are not limited to, our dependence on the convenience retail industry for our revenues; our dependence on qualified labor, senior management and other key personnel; declining cigarette sales volumes; competition in our distribution markets; risks and costs associated with efforts to grow our business through acquisitions; the dependence of some of our distribution centers on a few relatively large customers; manufacturers or retail customers adopting direct distribution channels; fuel and other transportation costs; failure, disruptions or security breaches of our information technology systems; the low-margin nature of cigarette and consumable goods distribution; our reliance on manufacturer discount and incentive programs and cigarette excise stamping allowances; our dependence on relatively few suppliers; product liability and counterfeit product claims and manufacturer recalls of products; our ability to achieve the expected benefits of implementation of marketing initiatives; failing to maintain our brand and reputation; unexpected outcomes in legal proceedings; attempts by unions to organize our employees; increasing expenses related to employee health benefits; changes to minimum wage laws; failure to comply with governmental regulations or substantial changes to governmental regulations; earthquake and natural disaster damage; increases in the number or severity of insurance and claims expenses; legislation, regulations and other matters negatively affecting the cigarette, tobacco and alternative nicotine industry; increases in excise taxes or reduction in credit terms by taxing jurisdictions; potential liabilities associated with sales of cigarettes and other tobacco products; changes to federal, state or provincial income tax legislation; reduction in the payment of dividends; currency exchange rate fluctuations; our ability to borrow additional capital; restrictive covenants in our Credit Facility; and changes to accounting rules or regulations. For a more detailed discussion of such factors, please refer to Part II, Item 1A, “Risk Factors” of any quarterly report on Form 10-Q and to Part I, Item 1A of our Annual Report on Form 10-K, for the year ended December 31, 2018 filed with the SEC on March 1, 2019. We undertake no obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise.

Our Business

Core-Mark is one of the largest marketers of fresh and broad-line supply solutions to the convenience retail industry in North America. We offer a full range of products, marketing programs and technology solutions to approximately 43,000 customer locations in the U.S. and Canada. Our customers include traditional convenience stores, drug stores, big box or supercenter stores, grocery stores, liquor stores and other specialty and small format stores that carry convenience products. Our product offering includes cigarettes, other tobacco products (“OTP”), alternative nicotine products, candy, snacks, fast food, groceries, fresh products, dairy, bread, beverages, general merchandise and health and beauty care products. As of June 30, 2019, we operated a network of thirty-two distribution centers in the U.S. and Canada (excluding two distribution facilities we operate as a third-party logistics provider).

Second Quarter Overview

Our net sales in the second quarter of 2019 were \$4,339.0 million compared to \$4,226.5 million for the same period in 2018, an increase of 2.7%, or \$112.5 million. The increase in net sales for the second quarter of 2019 was due primarily to a 7.5% increase in sales of food/non-food to existing customers, net market share gains and increases in cigarette prices. The increase in food/non-food sales to existing customers was driven primarily by strong growth in alternative nicotine products and increases in the fresh, food, candy and beverage product categories. Sales growth of alternative nicotine products, which has been strong for the past twelve months, may not continue at the same level going forward.

Gross profit in the second quarter of 2019 increased 10.1%, or \$22.0 million, to \$238.9 million from \$216.9 million for the same period in 2018, driven primarily by the increase in food/non-food sales to existing customers, including strong growth in alternative nicotine products and food, partially offset by a decline in cigarette cartons sold.

Gross profit margin increased 38 basis points to 5.51% of total net sales during the second quarter of 2019 from 5.13% for the same period in 2018. Gross profit margin benefited from a shift in sales mix toward higher margin food/non-food items and the success of our strategic pricing initiatives.

Operating expenses in the second quarter of 2019 increased 6.0%, or \$11.9 million, to \$210.5 million from \$198.6 million for the same period in 2018. The increase was due primarily to higher distribution expenses compared to the second quarter of 2018 and incremental costs related to the relocation of our headquarters. Operating expenses were 4.9% of total net sales for the second quarter of 2019 compared to 4.7% of total net sales for the same period in 2018. Operating expenses were 86.8% of remaining gross profit⁽¹⁾ for the second quarter of 2019, compared to 90.1% of remaining gross profit for the same period in 2018. The decrease in operating expenses as a percentage of remaining gross profit was due primarily to the increase in gross profit for the quarter and efficiencies in our warehouse operations, offset by the items mentioned above.

Net income in the second quarter of 2019 increased \$6.7 million, to \$17.7 million from net income of \$11.0 million for the same period in 2018. Adjusted EBITDA⁽¹⁾ increased \$11.1 million, or 26.2%, to \$53.5 million for the second quarter of 2019 from \$42.4 million for the same period in 2018. The increases in net income and Adjusted EBITDA were due primarily to the growth in gross profit, resulting from increases in food/non-food sales and margins, and operating expense leverage.

(1) Adjusted EBITDA and operating expenses as a percentage of remaining gross profit are non-GAAP financial measures and should be considered as a supplement to, and not as a substitute for, or superior to, financial measures calculated in accordance with generally accepted accounting principles in the United States of America (“GAAP”). See “Non-GAAP Financial Information.”

Business Strategy Overview

Core-Mark's mission is to be the most valued marketer of food, fresh and broad-line supply solutions to the convenience retail industry. Consistent with this mission, our strategic framework is centered around three key initiatives: growing sales and margins faster than the industry, providing industry leading category management solutions and leveraging our cost structure. The wholesale convenience retail industry remains highly fragmented, supporting significant opportunities for both organic growth and growth through strategic acquisitions. Core-Mark is one of the largest wholesale distributors to the convenience retail industry in North America, one of two national convenience retail distributors in the U.S. and the largest in Canada, and represents an estimated 7% market share of the in-store sales of convenience stores in North America.

Our growth initiatives include growing same store sales, gaining share of the more than 180,000 North American convenience stores and being opportunistic with acquisition opportunities. Our focus on providing industry leading category management solutions to our customers positions us to partner with retailers in an effort to increase their sales and profits. We offer a wide array of innovative, data-based marketing solutions for our customers to leverage in their pursuit of satisfying consumer demand. Whether it be our fresh or food offering, the benefits of our store specific marketing recommendations or the latest in ordering technologies, we are constantly working to lead the industry in the category management space. The final lever of our strategic framework is focused on leveraging costs. Core-Mark is actively engaged in efforts to increase the leverage of our operating cost structure through a range of initiatives, including technology investments, process improvement and employee engagement.

We believe consistent execution on the aforementioned strategic priorities will position Core-Mark as the leader in convenience retail distribution and provides a strong pathway to achieve sustainable shareholder returns.

Net Sales. Net sales in the second quarter of 2019 increased by \$112.5 million, or 2.7%, to \$4,339.0 million, from \$4,226.5 million for the same period in 2018. The increase in net sales was driven primarily by growth in food/non-food sales to existing customers, including strong growth in alternative nicotine products, manufacturers’ price increases of cigarettes and net market share gains, partially offset by a decrease in cigarette carton sales.

Net Sales of Cigarettes. Net sales of cigarettes in the second quarter of 2019 decreased by \$8.7 million, or 0.3%, to \$2,834.0 million from \$2,842.7 million for the same period in 2018, driven primarily by a 3.0% decrease in carton sales, partially offset by a 2.9% increase in the average sales price per carton due primarily to increases in cigarette manufacturers’ prices. Cigarette carton sales decreased by 2.8% and 5.9% in the U.S. and Canada, respectively, driven by a decline in the general consumption of cigarettes, partially offset by net market share gains.

We believe long-term cigarette consumption will continue to be adversely impacted by rising prices, increases in excise taxes and other legislative actions, diminishing social acceptance, sales through illicit markets and the increase in use of alternative nicotine products. We expect cigarette manufacturers will raise prices as carton sales decline in order to maintain or enhance their overall profitability, thus partially mitigating the effect of the declines to distributors. Historically, industry data indicates that convenience retailers have more than offset cigarette volume profit declines through higher sales of other nicotine products, fresh and food service, and other food/non-food products.

Net cigarette sales as a percentage of total net sales was 65.3% in the second quarter of 2019 compared to 67.3% for the same period last year.

Net Sales of Food/Non-food Products. Net sales of food/non-food products in the second quarter of 2019 increased \$121.2 million, or 8.8%, to \$1,505.0 million from \$1,383.8 million for the same period in 2018.

The following table provides net sales by product category for our food/non-food products (in millions, except percentages)⁽¹⁾:

Product Category	Three Months Ended		Increase (Decrease)	
	June 30,		Amounts	Percentage
	2019	2018

(1) Amounts and percentages have been rounded for presentation purposes and may differ from unrounded results.

The increase in food/non-food sales for the second quarter of 2019 was driven primarily by an increase of 7.5% in sales to existing customers and net market share gains. Our health, beauty & general category sales benefited from the increasing popularity of alternative nicotine products. We believe the overall trend toward the increased use of alternative nicotine and smokeless tobacco products will continue, and will partially offset the impact of the expected long-term decline of cigarette consumption. Sales growth in our OTP category was impacted by a manufacturer shortage of cigars; excluding cigars, OTP sales increased 6.6% for the second quarter of 2019.

Net sales of food/non-food products as a percentage of total net sales was 34.7% for the second quarter of 2019 compared to 32.7% for the same period in 2018.

Gross Profit. Gross profit represents profit after deducting cost of goods sold from net sales during the period. Inventory holding gains represent incremental revenues, whereas vendor incentives, OTP tax refunds and changes in last-in, first-out (“LIFO”) reserves are components of cost of goods sold. Gross profit in the second quarter of 2019 increased \$22.0 million, or 10.1%, to \$238.9 million from \$216.9 million for the same period in 2018, driven primarily by incremental sales of food/non-food to existing customers, including strong growth in alternative nicotine products and net market share gains, partially offset by the decline in cigarette cartons sold to existing customers.

Gross profit margin increased 38 basis points to 5.51% of total net sales during the second quarter of 2019 from 5.13% for the same period in 2018. The increase in gross profit margin was driven primarily by the overall shift in sales mix toward higher margin food/non-food items, driven in part by strong growth of alternative nicotine product sales and higher margins in the food category, partially offset by cigarette price inflation.

Increases in cigarette prices and excise taxes typically have a negative impact on our gross profit margins with respect to sales because gross profit on cigarette sales is generally fixed on a cents-per-carton basis. Therefore, as cigarette prices and taxes increase, gross profit generally decreases as a percentage of sales. Conversely, we generally benefit from food/non-food price increases because product costs for these categories are usually marked up using a percentage of cost of goods sold.

Distributors such as Core-Mark, may from time to time, earn higher gross profits on inventory and excise tax stamp quantities on hand at the time manufacturers increase their prices or when states, localities or provinces increase their excise taxes. Such increases are reflected in customer pricing for all subsequent sales, including sales of inventory on hand at the time of the increase. The resulting higher gross profits are referred to as inventory holding gains.

Our cigarette inventory holding gains were \$3.8 million in the second quarter of 2019 compared to \$3.5 million for the same period in 2018. We expect cigarette manufacturers will continue to raise prices as carton sales decline in order to maintain or enhance their overall profitability and the various taxing jurisdictions will raise excise taxes to make up for lost tax dollars related to consumption declines.

LIFO expense was \$7.4 million for the second quarter of 2019 compared to \$6.9 million for the same period of 2018. Since we value our inventory in the U.S. on a LIFO basis, our gross profit can be positively or negatively impacted depending on the

relative level of price inflation or deflation in manufacturer prices as reported in the Bureau of Labor Statistics Purchase Price Index (“PPI”) used to estimate and record our book LIFO expense.

The following table provides the components of gross profit (in millions, except percentages)⁽¹⁾:

(1) Amounts and percentages have been rounded for presentation purposes and may differ from unrounded results.

(2) See reconciliation of net sales, less excise taxes to net sales in “Non-GAAP Financial Information.”

(3) For 2019, the \$3.8 million of cigarette inventory holding gains were all attributable to the U.S. For 2018, \$2.7 million and \$0.8 million of the cigarette inventory holding gains were attributable to the U.S. and Canada, respectively.

(4) Remaining gross profit is a non-GAAP financial measure, which we provide to segregate the effects of LIFO expense, cigarette inventory holding gains and other items that significantly affect the comparability of gross profit.

Remaining gross profit, a non-GAAP financial measure (see reconciliation of remaining gross profit to gross profit in “Non-GAAP Financial Information”), increased \$22.2 million, or 10.1%, to \$242.5 million for the second quarter of 2019 from \$220.3 million for the same period in 2018. Remaining gross profit margin was 5.59% in the second quarter of 2019 compared to 5.21% for the same period in 2018.

Cigarette remaining gross profit, a non-GAAP financial measure (see reconciliation of cigarette remaining gross profit to cigarette gross profit in “Non-GAAP Financial Information”), decreased \$0.2 million, or 0.4%, to \$57.4 million for the second quarter of 2019 from \$57.6 million for the same period in 2018. A 3.0% decline in cigarette carton sales was offset by a 2.7% increase in remaining gross profit per carton.

Food/non-food remaining gross profit, a non-GAAP financial measure (see reconciliation of food/non-food remaining gross profit to food/non-food gross profit in “Non-GAAP Financial Information”), increased \$22.4 million, or 13.8%, to \$185.1 million for the second quarter of 2019 from \$162.7 million the same period in 2018. Food/non-food remaining gross profit margin in the second quarter of 2019 increased to 12.30% from 11.76% for the same period in 2018, driven primarily by an increase in sales of higher-margin alternative nicotine products, higher margins in our food category and our strategic pricing initiative.

For the second quarter of 2019, our remaining gross profit for food/non-food products was 76.3% of our total remaining gross profit compared to 73.9% for the same period in 2018.

Operating Expenses. Our operating expenses include costs related to warehousing and distribution, selling, general and administrative expenses and amortization of intangible assets. In the second quarter of 2019, operating expenses increased by \$11.9 million, or 6.0%, to \$210.5 million from \$198.6 million for the same period in 2018. The increase in operating expenses was due primarily to higher distribution expenses and costs related to the relocation of our corporate headquarters. As a percentage of total net sales, operating expenses were 4.9% for the second quarter of 2019 compared to 4.7% for the same period in 2018. Operating expenses were 86.8% of remaining gross profit, a non-GAAP financial ratio, (see reconciliation of operating expenses as a percentage of remaining gross profit, as well as an explanation of its significance, in “Non-GAAP Financial Information”) for the second quarter of 2019, compared to 90.1% of remaining gross profit for the same period in 2018. Operating expenses as a percentage of remaining gross profit was favorably impacted by the sales mix shift to higher-margin food/non-food products and efficiencies in our warehouse operations, offset by the items mentioned above.

Warehousing and Distribution Expenses. Warehousing and distribution expenses increased \$8.9 million, or 6.6%, to \$143.2 million in the second quarter of 2019 from \$134.3 million for the same period in 2018. Warehousing and distribution expenses were 3.3% of total net sales for the second quarter of 2019 compared to 3.2% of total net sales for the same period in 2018. Warehouse and distribution expenses were 59.1% of remaining gross profit, a non-GAAP financial ratio, (see reconciliation,

as well as an explanation of its significance, in “Non-GAAP Financial Information”) for the second quarter of 2019, compared to 61.0% of remaining gross profit for the same period in 2018. Increases in warehouse productivity were offset by higher distribution expenses.

Selling, General and Administrative (“SG&A”) Expenses. SG&A expenses increased \$2.9 million, or 4.7%, to \$64.6 million in the second quarter of 2019 from \$61.7 million for the same period in 2018. SG&A expenses were 1.5% of total net sales for the second quarter of 2019 and 2018. SG&A was 26.6% of remaining gross profit, a non-GAAP financial ratio (see reconciliation, as well as an explanation of its significance, in “Non-GAAP Financial Information”), for the second quarter of 2019 compared to 28.0% of remaining gross profit for the same period in 2018. The second quarter of 2019 included \$1.6 million of incremental costs related to the relocation of our headquarters and the second quarter of 2018 included a \$1.0 million charge related to a legal settlement.

Amortization Expense. Amortization expense increased \$0.1 million, or 3.8%, in the second quarter of 2019 to \$2.7 million from \$2.6 million for the same period in 2018.

Interest Expense, Net. Interest expense, net, includes interest income and expense, amortization of loan origination costs related to borrowings, facility fees and interest on finance lease obligations. Interest expense, net decreased \$0.2 million, or 5.9%, in the second quarter of 2019, to \$3.2 million from \$3.4 million for the same period in 2018. The decrease in net interest expense was due primarily to lower average borrowings during the second quarter of 2019, partially offset by an increase in the average borrowing rate. Average borrowings in the second quarter of 2019 were \$235.2 million with a weighted-average interest rate of 3.7% compared to average borrowings of \$316.2 million with a weighted-average interest rate of 3.1% for the same period in 2018.

Foreign Currency Transaction (Losses) Gains, Net. We recognized a foreign currency loss of \$1.0 million in the second quarter of 2019 compared to a gain of \$0.5 million for the same period in 2018. The change was due primarily to fluctuations in our net intercompany borrowing position and the Canadian/U.S. exchange rate. During times of a strengthening U.S. dollar, we generally record foreign currency losses from our Canadian operations. Conversely, during times of a weakening U.S. dollar, we generally record foreign currency gains.

Income Taxes. For the second quarter of 2019, we recognized an income tax provision of \$6.5 million compared to \$4.4 million for the same period in 2018. We currently expect our effective tax rate to be approximately 25% for 2019.

Adjusted EBITDA. Adjusted EBITDA increased \$11.1 million, or 26.2%, to \$53.5 million for the second quarter of 2019 from \$42.4 million for the same period last year, driven primarily by incremental gross profit generated from increases in food/non-food sales and margins, and operating expense leverage (see the reconciliation of Adjusted EBITDA to net income in “Non-GAAP Financial Information”).

Net Sales. Net sales for the six months ended June 30, 2019 increased by \$60.7 million, or 0.8%, to \$8,093.1 million, from \$8,032.4 million for the same period in 2018. The increase in net sales was driven primarily by growth in sales of food/non-food to existing customers, cigarette manufacturer price increases and net market share gains. The increases in net sales were offset by a decrease in cigarette carton sales to existing customers, the expiration of the Kum & Go (“K&G”) distribution agreement in April 2018 and the transition of certain Rite-Aid stores, which were acquired by Walgreens, as well as one less selling day in 2019 compared to the same period in 2018.

Net Sales of Cigarettes. Net sales of cigarettes for the six months ended June 30, 2019 decreased by \$78.7 million, or 1.5%, to \$5,301.5 million from \$5,380.2 million for the same period in 2018. The decrease in cigarette net sales was driven primarily by a 4.8% decline in carton sales, partially offset by a 3.4% increase in the average sales price per carton. The increase in the average sales price per carton was due primarily to increases in cigarette manufacturers’ prices. Cigarette carton sales decreased by 4.6% and 7.0% in the U.S. and Canada, respectively, driven primarily by a decline in the general consumption of cigarettes and the transition of certain Rite-Aid stores compared to the first half of 2018, partially offset by market share gains.

Net cigarette sales as a percentage of total net sales was 65.5% for the six months ended June 30, 2019 compared to 67.0% for the same period last year.

Net Sales of Food/Non-food Products. Net sales of food/non-food products for the six months ended June 30, 2019 increased \$139.4 million, or 5.3%, to \$2,791.6 million from \$2,652.2 million for the same period in 2018.

The following table provides net sales by product category for our food/non-food products (in millions, except percentages)⁽¹⁾:

Product Category	Six Months Ended		Increase (Decrease)

Total food/non-food Products	\$ 2,791.6	\$ 2,652.2	\$ 139.4	5.3 %

(1) Amounts and percentages have been rounded for presentation purposes and may differ from unrounded results.

The increase in food/non-food sales for the six months ended June 30, 2019 was driven primarily by an increase of 7.1% in sales to existing customers, as well as net market share gains, partially offset by the expiration of our distribution agreement with K&G, the transition of certain Rite-Aid stores and one less selling day in 2019 compared to the same period in 2018. Our health, beauty & general category sales benefited from the increasing popularity of alternative nicotine products. We believe the overall trend toward the increased use of alternative nicotine and smokeless tobacco products will continue and will partially offset the impact of the expected long-term decline of cigarette consumption. Sales growth in our OTP category was impacted by a manufacturer shortage of cigars; excluding cigars, OTP sales increased 3.9% for the first half of 2019.

Net sales of food/non-food products as a percentage of total net sales was 34.5% for the six months ended June 30, 2019 compared to 33.0% for the same period in 2018.

Gross Profit. Gross profit represents profit after deducting cost of goods sold from net sales during the period. Inventory holding gains represent incremental revenues, whereas vendor incentives, OTP tax refunds and changes in LIFO reserves are components of cost of goods sold. Gross profit for the six months ended June 30, 2019 increased \$30.4 million, or 7.3%, to \$447.1 million from \$416.7 million for the same period in 2018. The increase in gross profit was driven primarily by incremental sales of food/non-food to existing customers, including strong growth in alternative nicotine products and net market share gains, partially offset by a decline in cigarette cartons sold.

Gross profit margin increased 33 basis points to 5.52% of total net sales for the six months ended June 30, 2019 from 5.19% for the same period in 2018. The increase in gross profit margin was driven primarily by the shift in sales mix toward higher-margin food/non-food items partially offset by cigarette price inflation.

Our cigarette inventory holding gains were \$12.6 million for the six months ended June 30, 2019 compared to \$10.6 million for the same period in 2018. We expect cigarette manufacturers will continue to raise prices as carton sales decline in order to maintain or enhance their overall profitability and the various taxing jurisdictions will raise excise taxes to make up for lost tax dollars related to consumption declines.

LIFO expense was \$14.4 million for the six months ended June 30, 2019 compared to \$12.8 million for the same period of 2018. Since we value our inventory in the U.S. on a LIFO basis, our gross profit can be positively or negatively impacted depending on the relative level of price inflation or deflation in manufacturer prices as reported in the Bureau of Labor Statistics PPI used to estimate and record our book LIFO expense.

The following table provides the components of gross profit (in millions, except percentages)⁽¹⁾:

(2) See reconciliation of net sales, less excise taxes to net sales in “Non-GAAP Financial Information.”

(3) For the six months ended June 30, 2019, \$11.2 million and \$1.4 million of the cigarette inventory holding gains were attributable to the U.S. and Canada, respectively. For the same periods in 2018, \$8.2 million and \$2.4 million of the cigarette inventory holding gains were attributable to the U.S. and Canada, respectively.

(4) Remaining gross profit is a non-GAAP financial measure, which we provide to segregate the effects of LIFO expense, cigarette inventory holding gains and other items that significantly affect the comparability of gross profit.

Remaining gross profit, a non-GAAP financial measure (see reconciliation of remaining gross profit to gross profit in “Non-GAAP Financial Information”), increased \$30.0 million, or 7.2%, to \$448.9 million for the six months ended June 30, 2019 from \$418.9 million for the same period in 2018. Remaining gross profit margin was 5.55% for the six months ended June 30, 2019 compared to 5.22% for the same period in 2018.

Cigarette remaining gross profit, a non-GAAP financial measure (see reconciliation of cigarette remaining gross profit to cigarette gross profit in “Non-GAAP Financial Information”), decreased \$0.7 million, or 0.7%, to \$105.5 million for the six months ended June 30, 2019 from \$106.2 million for the same period in 2018. Cigarette remaining gross profit per carton increased 4.3% for the six months ended June 30, 2019 compared to the same period in 2018, driven primarily by higher manufacturers’ discounts as a result of the increase in cigarette prices.

Food/non-food remaining gross profit, a non-GAAP financial measure (see reconciliation of food/non-food remaining gross profit to food/non-food gross profit in “Non-GAAP Financial Information”), increased \$30.7 million, or 9.8%, to \$343.4 million for the six months ended June 30, 2019 from \$312.7 million the same period in 2018. Food/non-food remaining gross profit margin for the six months ended June 30, 2019 was 12.30% compared to 11.79% for the same period in 2018. The increase in food/non-food remaining gross profit margin was driven primarily by an increase in sales of higher-margin alternative nicotine products and higher margins in our food and candy categories.

For the six months ended June 30, 2019, our remaining gross profit for food/non-food products was 76.5% of our total remaining gross profit compared to 74.6% for the same period in 2018.

Operating Expenses. Our operating expenses include costs related to warehousing and distribution, selling, general and administrative expenses and amortization of intangible assets. For the six months ended June 30, 2019, operating expenses increased by \$16.5 million, or 4.2%, to \$413.3 million from \$396.8 million for the same period in 2018. The increase was due primarily to higher distribution expenses, costs related to the relocation of our headquarters and an increase in bad debt expense. As a percentage of total net sales, total operating expenses increased approximately 20 basis points to 5.1% for the six months ended June 30, 2019 compared to 4.9% for the same period in 2018. Operating expenses were 92.1% of remaining gross profit, a non-GAAP financial ratio, (see reconciliation of operating expenses as a percentage of remaining gross profit, as well as an explanation of its significance, in “Non-GAAP Financial Information”) for the six months ended June 30, 2019, compared to 94.7% of remaining gross profit for the same period in 2018. Operating expenses as a percentage of remaining gross profit was favorably impacted by the sales mix shift to higher-margin food/non-food products, an increase in warehouse productivity and SG&A cost containment.

Warehousing and Distribution Expenses. Warehousing and distribution expenses increased \$10.8 million, or 4.1%, to \$277.4 million for the six months ended June 30, 2019 from \$266.6 million for the same period in 2018. The increase in warehousing

[Table of Contents](#)

and distribution expenses for the six months ended June 30, 2019 was due primarily to higher distribution and workers' compensation costs. As a percentage of total net sales, warehousing and distribution expenses increased approximately 10 basis points to 3.4% for the six months ended June 30, 2019 compared to 3.3% for the same period in 2018. Warehouse and distribution expenses were 61.8% of remaining gross profit, a non-GAAP financial ratio, (see reconciliation, as well as an explanation of its significance, in "Non-GAAP Financial Information") for the six months ended June 30, 2019, compared to 63.6% of remaining gross profit for the same period in 2018.

Selling, General and Administrative Expenses. SG&A expenses increased \$5.4 million, or 4.3%, for the six months ended June 30, 2019, to \$130.5 million from \$125.1 million for the same period in 2018. The increase in SG&A expenses for the six months ended June 30, 2019 was due primarily to \$2.2 million of incremental costs related to the relocation of our headquarters and \$2.0 million of legacy bad debt expense. As a percentage of net sales, SG&A expenses were 1.6% for each of the six months ended June 30, 2019 and 2018. SG&A was 29.1% of remaining gross profit, a non-GAAP financial ratio, (see reconciliation, as well as an explanation of its significance, in "Non-GAAP Financial Information") for the six months ended June 30, 2019, compared to 29.9% of remaining gross profit for the same period in 2018.

Amortization Expense. Amortization expense increased \$0.3 million, or 5.9%, for the six months ended June 30, 2019, to \$5.4 million from \$5.1 million for the same period in 2018.

Interest Expense, Net. Interest expense, net decreased \$0.6 million, or 8.3%, to \$6.6 million for the six months ended June 30, 2019, from \$7.2 million for the same period in 2018. The decrease in net interest expense was due primarily to lower average borrowings, partially offset by an increase in the average borrowing rate. Average borrowings for the six months ended June 30, 2019 were \$256.3 million, with a weighted-average interest rate of 3.7%, compared to average borrowings of \$388.7 million and a weighted-average interest rate of 2.9% for the same period in 2018.

Foreign Currency Transaction (Losses) Gains, Net. We recognized a foreign currency loss of \$1.2 million for the six months ended June 30, 2019 compared to a gain of \$0.9 million for the same period in 2018. The change was due primarily to fluctuations in our net intercompany borrowing positions and the Canadian/U.S. exchange rate.

Income Taxes. For the six months ended June 30, 2019, we recognized an income tax provision of \$7.0 million compared with a provision of \$3.9 million for the same period in 2018. We currently expect our effective tax rate to be approximately 25% for 2019.

Adjusted EBITDA. Adjusted EBITDA increased \$16.5 million, or 24.7%, to \$83.2 million for the six months ended June 30, 2019 from \$66.7 million for the same period last year driven primarily by the growth in food/non-food gross profit and operating expense leverage (see reconciliation of Adjusted EBITDA to net income in "Non-GAAP Financial Information").

Non-GAAP Financial Information

The financial statements in this Quarterly Report on Form 10-Q are prepared in accordance with GAAP. Core-Mark uses certain non-GAAP financial measures including (i) Adjusted EBITDA, (ii) net sales, less excise taxes, (iii) remaining gross profit (including cigarette remaining gross profit and food/non-food remaining gross profit), (iv) remaining gross profit margin (including cigarette remaining gross profit margin and food/non-food remaining gross profit margin), (v) remaining gross profit margin less excise taxes (including cigarette remaining gross profit margin less excise taxes and food/non-food remaining gross profit margin less excise taxes), (vi) cigarette remaining gross profit per carton and (vii) operating expenses (and the components thereof) as a percentage of remaining gross profit. We believe these non-GAAP financial measures provide meaningful supplemental information for investors regarding the performance of our business and facilitate a meaningful period to period evaluation. We also believe these measures allow investors to view results in a manner similar to the method used by our management. Management uses these non-GAAP financial measures in order to have comparable financial results to analyze changes in our underlying business. These non-GAAP measures should be considered as a supplement to, and not as a substitute for, or superior to, financial measures calculated in accordance with GAAP. These measures may be defined differently than other companies and therefore, such measures may not be comparable to ours. We strongly encourage investors and stockholders to review our financial statements and publicly filed reports in their entirety and not to rely on any single financial measure. These non-GAAP measures are defined as follows:

(i) Adjusted EBITDA is a measure used by management to measure operating performance. Adjusted EBITDA is also among the primary measures used externally by our investors, analysts and peers in our industry for purposes of valuation and comparing our results to other companies. Adjusted EBITDA is equal to net income adding back net interest expense, provision for income taxes, depreciation and amortization, LIFO expense, stock-based compensation expense and net foreign currency transaction gains or losses. See the Adjusted EBITDA tables in our Management's Discussion and Analysis for additional details on the components of Adjusted EBITDA.

(ii) Net sales, less excise taxes is a non-GAAP financial measure which we provide to separate the increase in sales and gross profits due to product sales growth and increases in state, local and provincial excise taxes, which we are responsible for collecting and remitting. Federal excise taxes are levied on the manufacturers' who pass the tax on to us as part of the product cost, and thus are not a component of our excise taxes. Although increases in cigarette taxes result in higher net sales, our overall gross profit percentage may be reduced.

(iii) Remaining gross profit (including cigarette remaining gross profit and food/non-food remaining gross profit), (iv) remaining gross profit margin (including cigarette remaining gross profit margin and food/non-food remaining gross profit margin), (v) remaining gross profit margin less excise taxes (including cigarette remaining gross profit margin less excise taxes and food/non-food remaining gross profit margin less excise taxes), and (vi) cigarette remaining gross profit per carton, are non-GAAP financial measures, which we provide to segregate the effects of LIFO expense, cigarette inventory holding gains and certain other items that significantly affect the comparability of gross profit.

(vii) Operating expenses (and the components thereof) as a percentage of remaining gross profit is a non-GAAP financial measures, which is used by management to measure operating leverage. Although management also uses operating expenses as a percentage of net sales, this metric may be impacted on a comparable basis by, among other items, excise taxes, changes in manufacturers' prices (including inflation), and our continuing trend in sales mix shift from cigarettes to higher-margin food/non-food items which have substantially lower selling prices.

Liquidity and Capital Resources

Our cash and cash equivalents were \$33.3 million and \$27.3 million as of June 30, 2019 and December 31, 2018, respectively.

Our liquidity requirements arise primarily from our working capital needs, capital expenditures, debt service requirements for our revolving credit facility (“Credit Facility”), income taxes, repurchases of common stock and dividend payments. We have historically funded our liquidity requirements through our cash flows from operations and external borrowings. For the six months ended June 30, 2019, our cash flows provided by operating activities were \$30.8 million. Subject to borrowing base limitations, we had \$407.2 million of borrowing capacity available under our Credit Facility, excluding our expansion feature of \$200.0 million, as of June 30, 2019.

Based on our anticipated cash needs, availability under our Credit Facility and the scheduled maturity of our debt, we expect that our current liquidity will be sufficient to meet our anticipated operating needs during the next twelve months.

Cash Flows from Operating Activities

Our cash flows from operating activities, including net income, net non-cash additions to net income and changes in operating assets and liabilities (working capital), provided net cash of \$30.8 million for the six months ended June 30, 2019 compared to \$169.3 million of net cash provided for the same period in 2018, a decrease of \$138.5 million. The decrease was primarily attributable to changes in working capital during the comparative periods.

Working capital used cash of \$42.9 million for the six months ended June 30, 2019, compared to provided \$110.6 million of cash for the six months ended June 30, 2018, a decrease of \$153.5 million. These contributions for the comparative periods were impacted by, among other items, inventory levels and an increase of receivables due primarily to the timing of sales during the period. The inventory levels for the second quarter may vary depending on the timing of cigarette and other manufacturers’ price increases, and other factors.

Our cash flows from operating activities were impacted by the following movements in working capital (in millions):

	Six Months Ended		Change
	June 30,		
	2019	2018	
Accounts receivable, net	\$ (79.3)	\$ (27.4)	\$ (51.9)
Other receivables, net	(17.8)	11.1	(28.9)
Inventories, net	89.6	167.6	(78.0)
Deposits, prepayments and other non-current assets	(54.5)	(46.7)	(7.8)
Accounts payable	62.4	55.0	7.4
Cigarette and tobacco taxes payable	(54.1)	(56.6)	2.5
Claims, accrued and other long-term liabilities	10.8	7.6	3.2
Net cash (used in) provided by changes in working capital	<u>\$ (42.9)</u>	<u>\$ 110.6</u>	<u>\$ (153.5)</u>

Cash Flows from Investing Activities

Our investing activities used net cash of \$11.1 million for the six months ended June 30, 2019 compared to net cash used of \$10.4 million for the same period in 2018. Additions to property, plant and equipment were \$9.2 million for both of the six months ended June 30, 2019 and 2018. We expect capital expenditures for 2019 to be approximately \$30.0 million, which will be utilized primarily for maintenance and expansion projects.

Cash Flows from Financing Activities

Our financing activities used net cash of \$13.4 million for the six months ended June 30, 2019 compared to net cash used of \$167.6 million for the same period in 2018, a decrease of \$154.2 million. Net repayments of our Credit Facility during the six months ended June 30, 2019 were \$9.3 million compared to net repayments of \$148.2 million for the same period in 2018. The decrease in Credit Facility repayments was in part due to working capital movements described above.

Our Credit Facility

We have a Credit Facility with a capacity of \$750.0 million as of June 30, 2019, limited by a borrowing base consisting of eligible accounts receivable and inventories. The Credit Facility expires in March 2022 and has an expansion feature which permits an increase of up to \$200.0 million, subject to borrowing base requirements. All obligations under the Credit Facility are secured

[Table of Contents](#)

by first-priority liens on substantially all of our present and future assets. The terms of the Credit Facility permit prepayment without penalty at any time (subject to customary breakage costs with respect to London Interbank Offered Rate or Canadian Dollar Offered Rate based loans prepaid prior to the end of an interest period).

Amounts related to the Credit Facility are as follows (in millions):

	June 30,	December 31,
	2019	2018
Amounts borrowed, net	\$ 310.7	\$ 320.0
Outstanding letters of credit	16.7	16.7
Amounts available to borrow ⁽¹⁾	407.2	328.9

(1) Subject to borrowing base limitations, and excluding expansion feature of \$200.0 million.

Average borrowings during the three and six months ended June 30, 2019 were \$235.2 million and \$256.3 million, respectively, with outstanding amounts borrowed at any one time ranging from \$141.7 million to \$390.0 million over the six-month period. For the three and six months ended June 30, 2018, average borrowings were \$316.2 million and \$388.7 million, respectively, with outstanding amounts borrowed at any one time ranging from \$232.0 million to \$575.0 million over the six-month period.

Off-Balance Sheet Arrangements

There have been no material changes to the information provided in our Annual Report on Form 10-K for the year ended December 31, 2018, as filed with the SEC on March 1, 2019, regarding off-balance sheet arrangements.

Critical Accounting Policies and Estimates

There have been no significant changes during this quarter to our critical accounting policies as discussed in our Annual Report on Form 10-K for the year ended December 31, 2018, as filed with the SEC on March 1, 2019.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Our market risk disclosures set forth in Item 7A of our Annual Report on Form 10-K for the year ended December 31, 2018, as filed with the SEC on March 1, 2019, did not change materially during the six months ended June 30, 2019.

ITEM 4. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

We conducted, under the supervision and with the participation of our management, including the Chief Executive Officer and Chief Financial Officer, an evaluation of the effectiveness of the design and operation of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended). Based on our evaluation, the Chief Executive Officer and Chief Financial Officer concluded that, as of June 30, 2019, our disclosure controls and procedures were effective.

Changes in Internal Control over Financial Reporting

There were no changes in our internal control over financial reporting that occurred during the quarter ended June 30, 2019 that have materially affected, or are reasonably likely to materially affect, the internal control over financial reporting.

PART II. OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

The Company is subject to certain legal proceedings, claims, investigations and administrative proceedings in the ordinary course of its business. The Company records a provision for a liability when it is both (a) probable that the liability has been incurred and (b) the amount of the liability can be reasonably estimated. These provisions, if any, are reviewed at least quarterly and adjusted to reflect the impacts of negotiations, settlements, rulings, advice of legal counsel and other information and events pertaining to a particular case. In the opinion of management, the outcome of pending litigation is not expected to have a material effect on the Company's results of operations, financial condition or liquidity.

ITEM 1A. RISK FACTORS

There have been no material changes from the Risk Factors previously disclosed in our Annual Report on Form 10-K for the year ended December 31, 2018, as filed with the SEC on March 1, 2019.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

There were no repurchases of common stock by the Company during the six months ended June 30, 2019.
